

The Ministry of Education

Introduction

In the past 4 years it has been my privilege to serve as superintendent in the ministry of education for Southern California Conference.

I would like to highlight four areas of educational importance in our conference.

I. Spiritual Growth

- Every day on our campuses, our principals, teachers and staff are mentoring Jesus to our students.
- They are training students to become Christ-centered adults who will be part of this church for years to come.
- They are building churches and church leaders for the future.

II. Student Academic Growth

Over the last four years I have watched our students grow academically through:

- Robotics
- STEM Education
- Outdoor education experiences
- Classroom learning through quality teaching

III. Principals' and Teachers' Professional Growth

- Principal Enrichment Program (PEP)
- Differentiated Instruction
- Best Practices in Teaching Seminars
- Building Learning Communities In-service

Proud of your principals and teachers!

IV. SCC K-12 College Preparatory Education... the students

- Tracking Program- Where are our students four years after they graduate?
72% have completed a four-year degree or have senior status.
71 % of those students are going to graduate school.
8% students have finished a two-year degree (such as AS in nursing, etc.)

80% of our students either have a two-year or four-year degree after graduating from one of our schools.

Conclusion

It is our desire for every student in Southern California Conference to be able to have a Christian education and be a part of the success story that Christ has for their life.

Our hope is that the students through their principals, teachers and staff will be mentored Jesus each and every day so that they can feel the love of Christ and have eternal life.
